MEMORANDUM

TO	:	Management Team / C-Level Executives
FROM	:	Vista Sasmita Padmanagara – Data Analyst
DATE	:	October 28, 2026
SUBJECT	:	E-Commerce Customer Intelligence & Retention Strategy

EXECUTIVE SUMMARY

This report presents an end-to-end analysis of 96,000+ e-commerce transactions to identify customer behavior patterns and optimize revenue retention. While the business shows stable revenue growth (15.16M total), a critical retention leak was identified: 56% of customers are "Lost" after their first purchase. However, a high-value "At-Risk" segment representing 6.64M in revenue has been identified for immediate re-engagement.

KEY FINDINGS

1. **The Retention Crisis:** Over half of our customer base (56%) are one-time buyers. Only 6.4% are "Champions" (highly active, high spenders).
2. **Hidden Revenue Opportunity:** The "At-Risk" segment (18.5% of customers) contributes **6.64M in revenue** but has been inactive for >150 days. Top at-risk states are MG, MS, and SP.
3. **Logistics Directly Impacts Satisfaction:** On-time deliveries yield an average rating of **4.29**, while late deliveries plummet to **2.57** (a 40% drop in satisfaction).
4. **Category & Regional Dominance:** "Beleza Saude" (Health & Beauty) leads category revenue (1.23M), and São Paulo (SP) dominates regional revenue (5.7M).

STRATEGIC RECOMMENDATIONS

To maximize ROI and customer lifetime value, I recommend the following immediate actions:

- **Launch Targeted "Win-Back" Campaigns:** Allocate marketing budget specifically to the "At-Risk" segment. Send personalized email vouchers (e.g., 15% discount) to the top 1,000 high-monetary inactive customers, prioritizing those in SP, RJ, and MG.
- **Prioritize Logistics for High-Value Orders:** Since late delivery destroys customer ratings, implement a "Priority Shipping" protocol for orders containing top-revenue categories (Health & Beauty, Home & Decor) to protect the 4.29 average rating.
- **Implement Cross-Selling Bundles:** Increase the current Average Order Value (157.24) by creating product bundles. Customers buying "Beleza Saude" should be recommended complementary items from "Religios Presentes" or "Cama Mesa Banho" at checkout.

NEXT STEPS

I have developed an interactive Power BI dashboard to track these metrics in real-time. I recommend a follow-up meeting next week to discuss the budget allocation for the "Win-Back" campaign and review the dashboard with the CRM team.
